

Alexan Customizable Projects

SIMPLE ELECTRONICS. GREAT INNOVATIONS.

EMDS

LED ELECTRONIC MOVING DISPLAY SYSTEM (EMDS)

Indoor

The **Alexan** LED Electronic Moving Display System (EMDS) enhances aesthetically the presentation of characters on billboards, cinemas, offices, schools, etc.

Using an advanced technology on microprocessors and microcontrollers, this product allows the user to enter information into the display with ease.

The comfort of having one controlling unit to update information on multiple display units improves work efficiency due to lesser inputting time.

Available in Curve (Modular) or Straight

Curve (Convex)

Outdoor

Directory

- Simulate, download, upload and store functions
- PC-interface • More than 20 character effects • Customizable length (up to 20ft)

DIGITAL CLOCK

Date and time synchronization has never been easier with the **Alexan** Digital Clock. Designed locally with the use of microcontroller, the clock moves in sync with the system time of the computer to which it is connected with an ordinary LAN cable. The product comes with a specially-designed software that can:

- manually update the date and/or time
- allow the user to choose the type of alarm from those embedded in the system (built-in chime or any multimedia files)
- pre-program a series of period for the alarm to go on and off on a given day

Time
