

working with ePLUS !!!

ePlus^{DT} is not an ordinary touch-screen. It's a fully digitized Tablet panel that enables user to directly make hand-writing on screen, interact with PC on screen and enjoy every kind of computing style like using a Tablet PC, but on a screen much bigger. Unlike a regular touch-screen, ePlus^{DT} won't allow the data damage or system crash caused by user's accidentally touching the screen with fingers.

- With ePlus
- "You can make the projective area a huge touchscreen, and even record everything you draw and say synchronously."
 - "You can simply save your multimedia recording to disk or Knowledge Center on the web server as the precious intelligence component."
 - "You can synchronously record the multimedia contents of onsite training for using in the scenario of e-learning."
 - "It's extremely easy to update ePlus multimedia message."

ePlus^{WT} a humanized communication platform more than just a system!

Not only nicely integrates the multimedia recording that includes Voice, Images, Text and dynamic Markup, ePLUS would highly compress the message for your easy transmission and sharing on the Internet and Intranet. It's even better that, in less than 10 minutes, ordinary people would be able to make their own multimedia presentation by ePLUS.
